Enterprise communications at scale

CORE CAPABILITIES

Project and program management | Product strategy and roadmaps | **Requirements and business analysis** | Agile delivery and governance | **Platform modernization and software delivery** | Stakeholder, vendor, and change leadership | **User research and workflow improvement** | KPIs, OKRs, risk, and executive reporting

RELEVANT PUBLIC-SECTOR AND REGULATED EXPERIENCE

Texas Health and Human Services: Led statewide Medicaid eligibility and claims modernization for a regulated cloud platform serving 1M+ users; strengthened auditability and HIPAA/CMS compliance, reduced decision latency 25%, and accelerated delivery cycles approximately 30%.

Deloitte public-sector delivery: Led discovery and multi-location Product, Engineering, UX, QA, Data, and government teams for Medicaid eligibility and claims modernization; translated CMS requirements into scalable platform capabilities.

Enterprise platform leadership: Owns strategy and modernization for mission-critical healthcare platforms and previously aligned four product squads supporting 500M+ annual regulated communications.

HOW NEVIAN SUPPORTS PRIME CONTRACTORS AND AGENCIES

- Named product/program leadership for complex software implementations and modernization programs.
- Defined work packages for discovery, requirements, roadmaps, governance, delivery recovery, and executive decision support.
- Flexible engagement as a subcontractor, staff-augmentation resource, or fixed-deliverable advisory partner.
